报告人简介

Susumu Mori, Ph.D., is a Professor in the Johns Hopkins Medicine Division of MR Research within the Department of Radiology and Radiological Science. Dr. Mori is an investigator whose research focuses primarily on developing novel magnetic resonance imaging (MRI) technologies to study brain anatomy. The Director of the Center for Brain Imaging Science in the Johns Hopkins Medicine Brain Science Institute, he is also affiliated with Johns Hopkins Alzheimer's Disease Research Center; the Kennedy Krieger Institute's F.M. Kirby Research Center for Functional Magnetic Resonance Imaging; and the Johns Hopkins Medical Institute's Laboratory of Brain Science Anatomical MRI.
